Excellence in Customer Experience

We are recognised as a **reliable, innovative, and expert** provider of **high-tech** solutions.

"Together with Kontron and Infor LN Automotive suite, Rimac achieved faster time to market, and improved operations and cost control throughout the value chain. This is important for the high-performance electric vehicles, but also to respond to tier-n requirements from various large global OEM business partners."*

Viktor Radošević, IT Product Manager at **Rimac Technology**

"IT network must be secure, robust, and reliable, which is of great importance for our compliance. Kontron is a strategic partner that follows the requirements of the industry, is aware of global trends, and proposes solutions that ensure an increase in the level of security and reliability of the network."*

Franc Škaler, Head of Business Informatics at **Krško Nuclear Power Plant**

"Kontron is a long-standing strategic partner of Cinkarna Celje in the field of network solutions. They provide us with highly available and reliable networks, expert support, and consulting on the selection of solutions that respond to the changing business needs of our company and at the same time raise the level of security."

Boris Špoljar, CIO, **Cinkarna Celje**

"It is extremely important that the technology we choose enables us to be efficient and reliable, and the partner who implements it must boast professional knowledge and practical experience. With the introduction of Cisco Data Center Fabric, implemented by Kontron, we chose a technology that is ready for the future with simple expandability and a modern way of communicating devices in the data center."*

Simon Pavovec, Director of ICT Infrastructure at **Mercator**
